

Quick Attach Work Platform

Quick Attach Work Platforms - Handy forklift work platforms attach safely and quickly to the forklift by inserting forks into blade pockets and chaining platform to the lift truck. These attachments are often used to be able to safely and efficiently transport maintenance staff. The tine or fork lock has to be engaged so as to lock the platform to the blades rightly. This particular attachment comprises a checker floor plate platform and a long strap along with hook in order to securely connect the platform to the tine truck. These work platforms are actually made of welded steel and powder coated using a blue finish. They have a hoisting capacity of 1000 lbs.
