With a association consisting of over 90 independent dealers, the lift truck group provides quality materials handling equipment to the wide-ranging North American market. Doosan Infracore America Lift Truck sellers successfully operate in over 220 service and product sales places all through Canada and the U.S. The lift truck product line impressively features 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding forklift company in the North American market, thanks to their consistency in maintaining a high level of consumer service excellence and optimum product performance to all Doosan Infracore Forklift users. The U.S. lift Truck division stationed in Cleveland has a expert team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the domestic forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion venture. Product sales of these products were originally targeted to state-run firms, large scale organizations, and the military. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical instruction became the new focus for improving quality and product development.

Daewoo started the first domestic forklift business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological improvements combined with sales success placed them in a position of considerable growth of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a global sales system and started exporting designs they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
